## **RESIDENTIAL PROGRAM OVERVIEW**

Firstly we at RESADA want to say, welcome to our program! We look forward to helping you on your journey to recovery.

RESADA's Residential Treatment Program is a highly supervised living arrangement while the client participates in a concentrated evidence based treatment program. The program is generally 30 days in length with services available to adult males and females ages 18 years and older. Daily structured activities include alcohol and drug education, individual counseling, group therapy, evaluations, social/life skills training, and development of continuing care plans, among other evidenced based treatments. RESADA is a non-medical facility, meaning that RESADA does not have any type of medical staff to assist you with any type of medical concerns.

RESADA is owned and operated by a non-profit corporation operating under the regulations of the Office of Behavioral Health and other Managed Service Organizations.

Preliminary indications of acceptance into the program may have been given to you over the telephone. However, final acceptance into the program will be determined within 5 working days of your arrival, intake evaluation, or upon receipt of any information or written documentation at any other time that may reflect reasons for denial of admission to RESADA. If RESADA's clinical staff determines that you're in need of a higher level of care and it is clinically necessary; RESADA staff will work at coordinating a continuing care plan to the proper level of care for you. RESADA cares deeply about our clients and want to make sure that each person receives the proper care they need and deserve.

As with any situation involving people, rules and regulations must be implemented and enforced for the health, safety and well-being of the persons involved. Therefore, the following House Rules are applicable to all clients during their stay at RESADA.
